Confirmation/Actions from Previous Minutes

June Meeting Minutes and Newsletter have been received and accepted as distributed.
Moved – ZL1MRC, Seconded –ZL1GAM.

Correspondence In

- Newsletters and other electronic correspondence have been forwarded to the members by the Secretary.

Correspondence Out

- Various emails by the Secretary have been sent out, mainly newsletters from other branches.

Financial Report

- *Finances to 14.7.2018 - by ZL1VPS*

not submitted

Members

- Bert Toomey – ZL1AQX visited us and ad-hoc decided to join our club as a **new member**.
Bert moved his QTH to Warkworth Summerset Village.
Because Bert acquired a new BTX40 set (see latest Break-In cover for a picture) he decided to donate some of his old rigs to our Club. The donated radios are all handmade with lots of love and dedication. They can actually be called “a piece of art”. See and read more about this in the Member’s Contribution section.
- Andrew ZL1ACP has announced that he will leave his Secretary office as per next AGM in February 2019. Our Club needs to find his replacement a.s.a.p. hence Andrew can brief and educate the new Secretary.
(Read more about this topic in the General Business section below).
- Reminder that every member should at least make 1 contribution per year. This can be any sort of presentation or a shack tour. Another possibility would be writing an article for our Webpage or at the very minimum telling us a real good joke.

AREC - Report and Activities

Nothing reported

Repeater – Trustee’s Report and Activities

- All working very well and Repeater’s status is regularly updated on our webpage.
- Average usage of the Repeater and the Repeater seems to coping well with the use.
- Repeater health report and status are online available and Members are encouraged to check the webpage for information.

General Business

Website

Gary is always looking for comments from club members about what changes to the website they would like to see. Please email Gary or Andrew or Paul with your thoughts.

Also hints for good Youtube videos are welcome so the video’s links can be uploaded to our webpage, so all our members can view and profit from it.

Mailing-List

Mailing-List is now running live and is already used by members.

Mike, John S., Paul K. and Gary are the first members who subscribed and have used the list's benefits.

Gary will send another email to all members with a description of how to use and join the List.

Search for a new Club Secretary

We are searching for a new Secretary because Andrew is vacating his office as per next AGM in February.

For our Club it is extremely important to fill this vacancy because without a Secretary we would have to go into recess (i.e. going into hibernation).

We are looking for anyone who is interested to take this challenge and responsibility. It is a very honourable and the most important role within our Club. This is the job giving you the highest pride and is doing the most for our Club. The average time spend for fulfilling this role is about 1-3 hours per month and varies depending on the season of the year.

Any interested person will be provided with details by Andrew who is our current Secretary. This office/role is organised such that the efforts are kept to a minimum and everybody is keen to support the Secretary in his role.

Any interests, please come forward and contact either Andrew, Paul or Gary for further information!

Brainstorming – Ideas about how to find a new Secretary (living list – growing):

- Split the job amongst members
- Ask John (ZL1BDY), ask Bert (ZL1AQX)
- Advertise amongst all members and recipients of the newsletter
- Ask other Clubs if they know someone

.....to be filled with more ideas.....please let us know!!!!.....

Office Holders

Reminder that each office holder shall update and maintain his personal “what I am doing” list. This handwritten list will be compiled into a “office holder activities overview” by the end of the year. This will help explaining about your work and activities involved in the office duty.

Alan has supplied his list (Education and Entertainment Champion’s tasks) and **he is the first one who did it** – Congratulations Alan !!!

Member's Contributions

Bert Toomey – ZL1AQX

- Bert brought some of his homebrew rigs to donate to the Club for whoever is interested in it:

80meter Transceiver, SSB, Twin crystal filters, 20Watt linear, PWS 12V/24V:

➔ This donation went to Gavin – ZL1GAM

40meter Transceiver, SSB, Twin crystal filters, 8Watt output:

→ This donation went to Paul – ZL1PAK

3band Receiver, 80/40/20meter, Eddystone horizontal dial, AGC and LO modules:

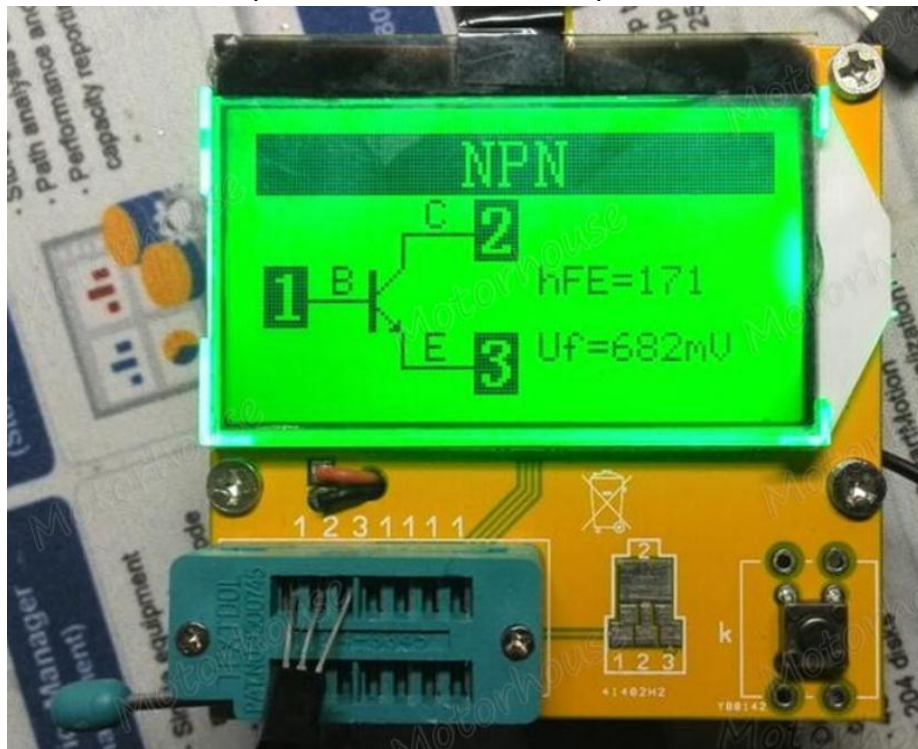

→ This donation is earmarked for Richard – ZL1DP (or else will go to Garry)

J-Pole VHF antenna:

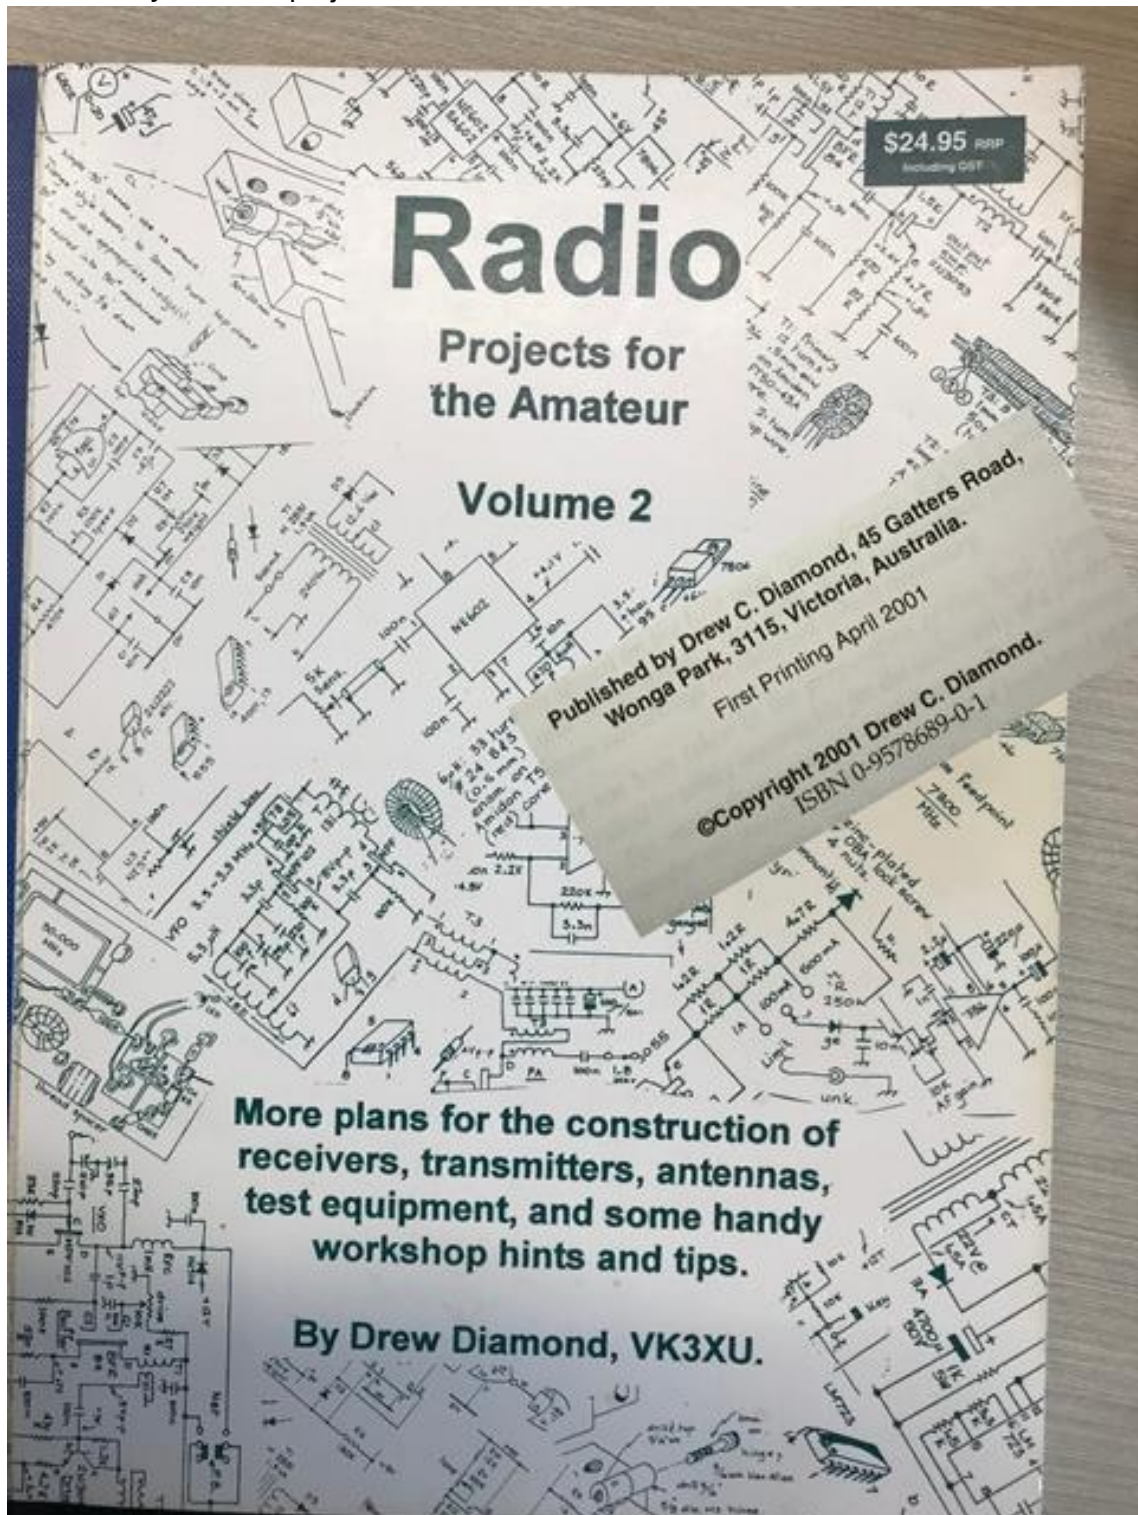

→ This donation went to Paul – ZL1PAK

- Bert also showed and demonstrated a 15\$ Chinese component tester, that analyses all sorts of components and shows their values (e.g. resistors, transistors, FETs, capacitors, coils, diodes, etc.).

- Many of Bert's projects are based on nice books he showed us:

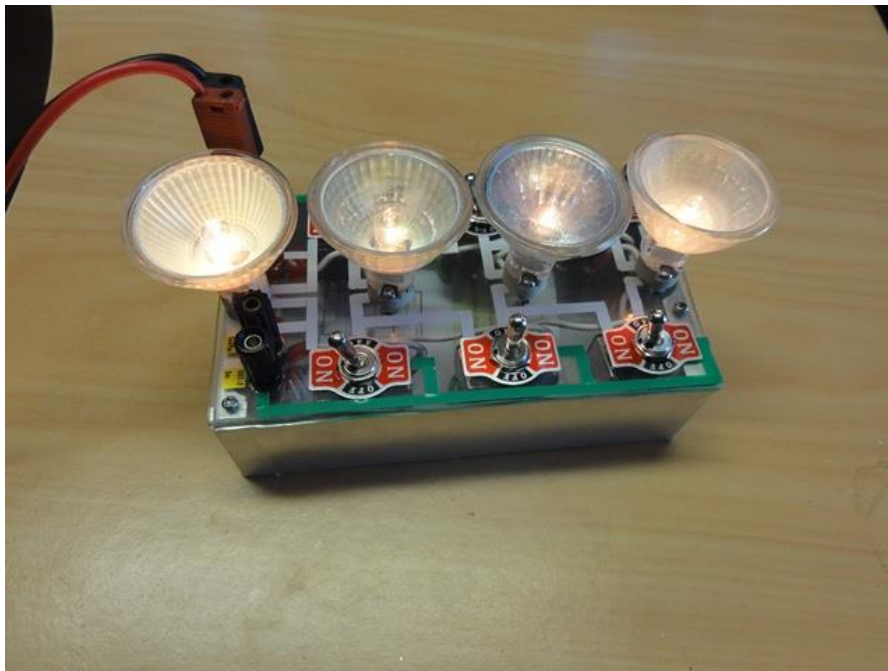

Paul Kaufmann – ZL1PAK

- I built the prototype of the Arduino Morse Decoder with the LM567. I however could not yet finish the project because I am still waiting for the Wi-Fi sheet to complete the project. So far the decoder runs well and it can pick up and decode Morse code played from a nearby iPhone and picked up by a microphone.

- I finished the 50-200Watt DC load and brought it to the meeting. It works well and I can switch amongst all possible combinations of parallel / serial combinations. It gives me a wide range from 1 –to- 48 volts with 50 –to- 200 watts and all sorts of resistance in the range of approximate 0.5 to 20 ohms (depending on the arrangement and the filaments' heat).

In the name of all, the Club would like to thank members who share their latest acquisitions and information with us. This makes our meetings more interesting and gives us the opportunities we would else not have.

Formal meeting closed ~11:45

NEXT MEETING:

10:00 - Saturday 11th August 2018

Meeting Room, Wellsford Library

Education/Entertainment Section

Videos shown:

- Falkirk Wheel

For viewing next:

- Learning Morse (30min)
- Android Spectrum Analyzer (9min)
- How FM radios work (29min)
- P25 and amateur radio (41min)

Presentations:

- Bert presented his homebrew transceivers, radios, books and a Chinese component tester.
- Quick review of Paul's Arduino Morse Decoder prototype and the final homebrew 50-200W DC load.
